

**Duquesne Light**

*Our Energy...Your Power*

*2825 New Beaver Avenue  
Building #6  
Pittsburgh, PA 15233-1003*

The goal of Duquesne Light's vegetation management program is to work with communities to manage the urban forest so that everyone can enjoy healthy, trees that live in harmony with safe, reliable electric service.

Duquesne Light uses qualified professionals in our line clearance program. These professional work to minimize outages from inappropriately planted trees growing into our overhead lines and equipment. These professionals use pruning methods approved by the American National Standard Institute which are recognized green industry best practices.

In the upcoming weeks, Duquesne Light will be performing line clearance activities in the Highland Park, Morningside and Stanton Heights neighborhoods.

If you have any questions concerning this work or would like to discuss the tree work in your area, please contact Duquesne Light at : 412-393-7100. A representative of our Vegetation Management Department will contact you to discuss your questions.
