Pittsburgh Community Service Inc. is offering this FREE course designed to provide individuals with an introduction to renewable energies including solar thermal, wind power, solar power and hydrogen fuel cells.

What will participants walk away with?

Through the Introduction to Renewable Energy Technology class, participants will receive an in-depth look at the basics of renewable energy technology. This is the perfect introduction for those interested in many green jobs in our region, but without existing knowledge on the subject.

Course Details

Time: The Introduction to Renewable Energy Technology Course will run about 8 weeks, either 1-2 evenings per week for a total of 20-30 hours of coursework.

Location: All classes will be held at the EECO Center, and the course will be taught by a CCAC instructor.

Cost: There is NO cost for this class, but you will be expected to attend a certain number of classes if accepted into the program.

Date: Classes will begin on Monday, March 4th at 6:30pm, and will continue on Mondays for 8 weeks. Some Wednesday evenings will also be scheduled.

To Sign Up:

Please contact Sierra Laventure-Volz at 412-661-0576 or sierralv@pghcsi.org with questions or to sign up for this free program.

Space is limited to 15 participants.
