YCAT Study

Is your child currently in treatment for a mood or behavioral problem?

Researchers at the University of Pittsburgh Medical Center (UPMC) are conducting a research **computer study** to learn more about the experience and impact of having mood problems.

Eligibility

- Boys & Girls
- Between 7-17 years old
- Currently in treatment for mood/ behavioral problem
- Parent willing to participate

Research Participants will be asked to complete a computer questionnaire on mood and health symptoms. **No computer experience is necessary**. One visit lasting approximately 2 hours will be needed. Volunteers will be compensated for their time.
