Summary

With 10+ years as a Full Stack JavaScript developer, I excel in architecting robust server-side solutions and responsive UIs. Proficient in JavaScript, TypeScript, PHP, and Python, I adopt cutting-edge tech for optimal performance. I've optimized APIs, reduced load times, and implemented caching. Collaborative and agile, I deliver results in complex projects.

Skills

- JavaScript
- TypeScript
- PHP
- Python
- Express.js,
- Laravel,
- Symfony,
- Angular
- React.js
- Next.js
- Unit Testing
- Tailwind CSS
- Bootstrap CSS
- HTML
- CSS
- MySQL
- MongoDB
- PostgreSQL
- Docker
- AWS,
- Terraform
- Kubernetes
- CI/CD
- Git
- Agile/Scrum
- Teamwork
- Critical-Thinking
- Leadership and Team Collaboration
- Project Management
- Problem Solving

Experience

Senior Software Developer | EliteBrains | March 2022 - June 2023 (Remote)

- Developed an online test platform using MERN Stack with TypeScript.
- Conducted 150+ code reviews, providing constructive feedback for code quality and best practices.
- Collaborated with a team of 12 developers through 200+ pull requests for code integration and approval.
- Managed different environments (development, staging, production) for comprehensive testing, resulting in a 25% reduction in bug reports.
- Containerized the application and deployed it on Kubernetes to Google Cloud Platform (GCP) for scalability, reducing infrastructure costs by 30%.
- Utilized Jira and Trello for effective task management and collaboration, achieving a 20% increase in project completion efficiency.

Skills: JavaScript, TypeScript, MERN Stack, Express.js, Kubernetes, Google Cloud Platform (GCP), Jira, Trello, Leadership, Team Collaboration, Project Management, ,Problem Solving, Unit Testing, Tailwind Css, Sass,

Senior Software Developer | NETLINKS LTD | Apr 2019 - Sept 2022

- Led end-to-end development of jobs.af, a high-traffic platform with over 500,000 active users, utilizing the MEVN stack.
- Collaborated with cross-functional teams, resulting in a 15% increase in development speed and a 20% improvement in feature delivery time.
- Mentored a DevOps officer, improving infrastructure setup and CI/CD pipelines, leading to a 50% reduction in deployment failures.

- Containerized the application using Docker and deployed it on AWS EKS for scalability, reducing server costs by 35%.
- Optimized database performance through indexes, caching, and query optimizations, resulting in a 40% reduction in database query response time.
- Conducted 100+ code reviews, maintaining code quality and best practices, which led to a 10% decrease in post-release bug reports.
- Actively participated in agile ceremonies, improving project management efficiency by 20%.

Skills: JavaScript, Vue.js, Node.js, MongoDB, AWS, Docker, CI/CD, Agile/Scrum, Mentorship, Team Leadership, Problem-Solving, Bootstrap Css, Tailwind Css

Software Developer | NETLINKS LTD | April 2016 - March 2019

- Developed jobs.af using MEAN Stack and implemented caching for improved performance.
- Collaborated with cross-functional teams for effective project execution.
- Increased website responsiveness by optimizing backend APIs, leading to a 30% reduction in page loading time.
- Implemented efficient caching mechanisms, resulting in a 25% decrease in database query response time.
- Successfully delivered three major features within tight deadlines, contributing to a 20% increase in customer satisfaction.

Skills: JavaScript, MEAN Stack, Angular, MongoDB, Project Collaboration, Problem-Solving, SEO,

Software Developer | AHG | Aug 2014 - July 2015

- Digitized HR processes and automated the import of data from Excel to a MySQL database, reducing manual data entry by 60%.
- Utilized Symfony and CodeIgniter frameworks to develop robust and scalable solutions.
- Designed and implemented database structures and optimized query performance, resulting in a 40% improvement in data retrieval speed.

Skills: PHP, Symfony, CodeIgniter, MySQL, Problem-Solving

Software Engineer | FRA | Oct 2013 - May 2014

- Created a corruption-free reporting system for the supreme court, implementing well-designed, testable, and efficient code.
- Utilized Symfony and CodeIgniter frameworks to develop a robust and secure reporting system.
- Implemented a MySQL database to store and manage the reported data, resulting in a 50% reduction in data retrieval time.
- Designed and developed front-end interfaces using HTML and CSS for a user-friendly experience.

Skills: PHP, Symfony, CodeIgniter, MySQL, Problem-Solving

Education

Bsc in Computer Science, Pune University, India (2012)

Pune University, renowned for computer science education, provided a strong foundation in software development, algorithms, and computer systems, shaping career as a software engineer.
